OBJECTIVE

Freelance Full-Stack Developer with 2+ years of experience shipping production backends and web apps for real users, including a dating-app backend serving 10k+ MAU. Strong in JavaScript/TypeScript (Node.js, React, Next.js), Python (FastAPI, Flask), and cloud deployment (AWS/Azure, Vercel).

EXPERIENCE

Freelance Full-Stack Developer

2023 – Present

Remote

- Architected and built FetAPI, a complete backend for a Tinder-style dating app, independently delivered for a client and serving ~10,000 monthly active users, covering matching, real-time chat, authentication, and media handling.
- Built the backend for Whisper, an anonymous chatting and community-based app, handling real-time messaging and community features for anonymous users.

Node.js Developer - Petuk Ji Pvt. Ltd.

Apr 2026 – Jun 2026

Remote

- Built an automated trading system to run strategies and execute algo trades across Groww, AngelOne, and Dhan.

Web Developer Intern - Redn Technologies

Mar 2022 – May 2022

Patna, India

- Developed website frontends using TailwindCSS and ReactJS.

PROJECTS

ClipKaroo - Automated Live-Stream Clipping SaaS

2026

Next.js, Node.js, Nightbot Integration, Stripe, Multi-Tenant Architecture | [Live URL](#)

- Built a SaaS platform enabling YouTube streamers to auto-capture highlight clips from live streams via chat commands (Nightbot integration), eliminating manual VOD editing.
- Designed a multi-tenant architecture with secure per-channel tokens, a role-based admin dashboard, and public creator pages serving timestamped clip feeds.
- Implemented a tiered subscription model (Stripe) gating premium features, including Discord webhook notifications.

AdxTools - Client-Side Web Utility Platform

2025 – Present

Next.js, React, TypeScript, Web Crypto API, Canvas API, pdf-lib, PWA | [Live URL](#)

- Built a 117+ tool web platform (formatters, converters, generators, image/PDF editors) where 100% of processing runs client-side, with zero user data ever touching a server, using a manifest-driven architecture that ships new tools as isolated, lazy-loaded bundles.
- Implemented browser-native processing pipelines (Web Crypto API, Canvas API, pdf-lib, pdfjs-dist) to replace what would typically require backend infrastructure, and shipped it as an installable, offline-capable PWA.

TaxMitra - AI-Powered Tax Filing System

2026

Next.js, MongoDB, Express.js, Node.js, Nodemailer, REST APIs | [Live URL](#)

- Built a full-stack MERN platform simplifying income tax filing and professional consultation, with secure auth, dynamic tax-data workflows, role-based access, and automated email notifications on a scalable backend.

SKILLS

- Languages: Node.js, Python, TypeScript, C++
- Web: React, Next.js, Svelte, FastAPI, Flask
- Databases: MySQL, PostgreSQL, MongoDB
- Cloud & Deploy: AWS, Azure, Vercel, Render, Heroku
- Tools: Git, GitHub, Docker, Postman
